

## Recommended Change in Google Hangout Meet Extension

Previously NB27 recommended to parents to install the following Chrome Extension (created by stgnola.org) in order to enable the Grid View when using Google Meet.

### Google Meet Grid View

Offered by: [stgnola.org](https://stgnola.org)

★★★★★ 461 | [Accessibility](#) | 9,000,000+ users

Due to recent inconsistencies experienced with using this extension, NB27 is recommending that parents remove this former extension and install this new Chrome extension (created by Chris Gamble) in order to consistently use the Grid View when working with Google Meet.

### Google Meet Grid View

Offered by: Chris Gamble

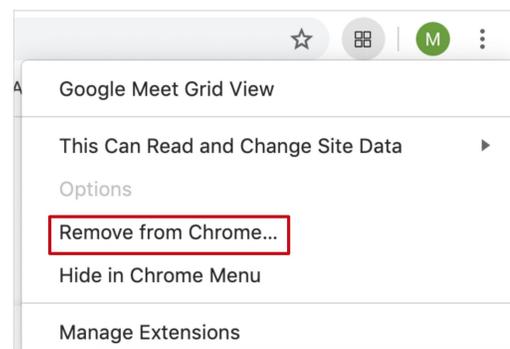

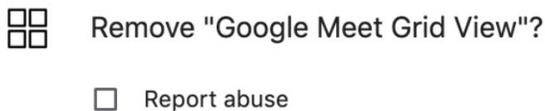

★★★★★ 8 | [Accessibility](#) | 1,000,000+ users

Here are the steps to change from the former Grid View extension and install the new extension:

- Locate the **Old Grid View extension**  at the upper right of your Chrome browser window.

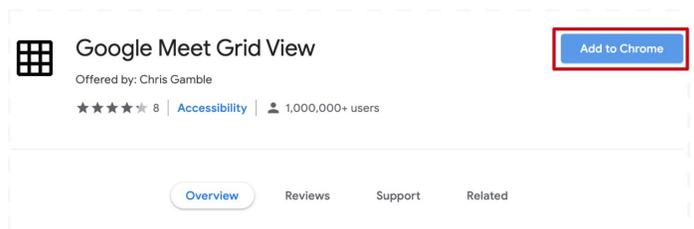

If you already have the **New Grid view extension**  and it is still not working, please reach out to us by filling out the [Tech Support form](#).

- Right-click on the extension and select **Remove from Chrome...**
- Select **Remove** to uninstall the extension

- [Follow this link to download the new extension](#)

- Select **Add to Chrome**

- Select **Add extension** to install the extension
